Daily Program

Our lives have changed since the Covid-19 pandemic. Distance learning, social distancing, and wearing face coverings are part of our daily routines. Wing Education Center has stood strong and remains flexible to help families to utilize available resources and develop virtual programs to ensure safety for all learners during the 2020-2021 school year.

The goal of the virtual tutoring program for our learners is to enrich English, Math, and Critical Thinking Skills, practice Chinese, as well as connect with people of their age. We will continue with this program until the pandemic has ceased and schools are safe to open again.

During this time, we have also opened tutoring and help for Middle school students as well as High School students.

Virtual School Class Schedule
